Mohamed_Aziz.Mrad@etu.sorbonne-universite.fr

Profile

Mathematics and Computer Science student at Sorbonne Université, with a strong academic record, statistical modelling coursework, and software-development experience. Interested in machine learning, algorithms, and applied mathematical research.

Education

Double Bachelor's Degree in Mathematics and Computer Science 2025 – present
Sorbonne Université, Paris, France

- Currently in second year. First-year annual average: 17.77/20.

Baccalauréat, with honours (*Très Bien*) 2021 – 2025
Lycée Pilote Bourguiba, Tunis, Tunisia

- Overall average: 18.96/20.

Self-Study

- **Machine Learning (Stanford CS229, Andrew Ng)**, YouTube lectures, 2026: studied supervised and unsupervised learning, regression, and model evaluation.
- **Introduction to Machine Learning (MIT 6.036)** and **Introduction to Algorithms (MIT 6.006)**, MIT OpenCourseWare, 2026: worked through lecture notes, problem sets, and videos.
- **Practical Deep Learning for Coders**, fast.ai, 2026: built project-based deep learning models.
- **Kaggle Learn**, 2026: Python, pandas, and introductory machine learning courses.
- **Hugging Face LLM Course**, 2026: modern large language model methods and tools.

Projects

Baseball Salary Analysis: Regression Modelling (team of three) January – March 2026
Sorbonne Université, supervised research workshop (Atelier de Recherche Encadrée, grade 95/100)

- Developed and presented, jointly with a teammate, a regression analysis of 263 Major League Baseball hitters (1986 performance, 1987 salaries). Explained the choice of predictors and the results; the final model explained 62.1% of the variance (adjusted $R^2 = 0.617$).
- Explained the logarithmic transformation of salaries, which addresses right skew and makes effects easier to interpret in relative terms.
- Interpreted diagnostic plots (Q-Q plots, residual plots, Shapiro–Wilk test) and identified non-linearity in the longevity effect as a limitation.

AI Ethics and Governance Summer Camp: Healthcare AI Concept Summer 2024
Summer Innovation Camp by Avila University, Tunis

- Co-designed a concept for a healthcare AI tool that flags genetic mutations and other patterns for doctors, presenting the evidence while leaving the clinical decision with the physician.

Academic Distinctions and Certifications

- **Double Gold Medal**, National Mathematics Games, Tunisia (2023 and 2024)
- **Mathematics Olympiad distinction** (April 2024)
- **SAT Excellence Certificate**, Amideast Tunis (2024): Mathematics 790/800; Reading and Writing 700/800
- **English C1 Certificate**, Ardmore Language School, United Kingdom (2023)
- **Duolingo English Test**: 135

Technical Skills

- **Programming:** Python; C; R (statistics coursework); Lua (FiveM roleplay server scripts, previous experience).
- **Currently learning:** Java; advanced C topics; discrete mathematics; machine learning (Stanford CS229).
- **Statistics:** Linear and multiple regression, log transformation, outlier detection, residual diagnostics, hypothesis testing.

- **Mathematics:** Analysis, linear algebra, probability, numerical analysis, graph theory and combinatorics.
- **Other:** Vehicle texture editing for GTA 5 roleplay servers; game-server administration.

Languages

- **Arabic:** Native speaker.
- **French:** Fluent; university studies in French at Sorbonne Université.
- **English:** C1 certified; Duolingo English Test 135; SAT Reading and Writing 700/800.

Experience

Mathematics Teacher 2025 – present
SAM Academy, France

- Teach mathematics to middle and high school students: explain course material, guide exercise work, and prepare students for tests and exams.

National Protocol Officer 2023 – 2024
National Coordination of Interact Clubs, Tunisia

- Ensured compliance with official protocol at national gatherings.
- Coordinated communications and relations with guests of honour and official partners.

Protocol Officer and National Representative 2021 – 2023
Interact Club Saint-Germain, Tunisia

- Organised logistics for club and inter-club events.
- Managed information flows between the club and national bodies, and supervised administrative follow-up and activity reports.

Founder and Administrator, Roleplay Gaming Server 2021 – 2022
Personal project

- Customised 3D buildings, vehicles, and textures by creating and editing existing scripts and adjusting object placement, dimensions, and visual design; managed server operations and moderation of an online roleplay community.

Founder and Project Lead, "Braille Menus" Inclusion Initiative 2020 – 2021
Tunisia

- Designed and deployed more than 50 braille menus for international and local restaurant brands.
- Negotiated directly with restaurateurs to make their venues more accessible to visually impaired customers.
